

Josie Mansergh-Johnson, MBACP, PgDip)

Family Services Practitioner

Josie is a compassionate MA Counselling student in the US and a qualified Therapist in the UK.

Josie specialises in working with children, families, and people in recovery, with experience in various settings in both countries.

For the last six years, whilst working and training in the UK, Josie volunteered with the Hazelden Betty Ford Children's Program in Rancho Mirage and knew this was the space she wanted to be in clinically.

After graduating in London in 2021, Josie moved to California, joined the Hazelden Betty Ford Graduate School where she has pioneered the first internship across Child and Family Services during her Master's Program, then officially joined the team to continue this meaningful work in Family Services.

Josie is also actively involved in research, contributes to Counsellor education and has special interests in culturally adapted therapy, working with children and intergenerational patterns.

For fun, Josie loves hiking, surfing, and walking her two dogs with her family.
